ROOFTEX

High Performance Liquid Waterproofing

www.conren.com

ROOFTEX

The ultimate in high performance waterproofing membranes for a diverse range of construction applications. A highly flexible, single component, cold applied liquid formulation, ROOFTEX is based on moisture curing polyurethane technology.

- **Easy to apply** - straight from drum by brush or squeegee
- **Cold applied** - no burners or heating required
- **Exceptional elasticity** - 500% elongation
- **Cures to a seamless membrane** - joint free
- **UV stable** - does not harden or become brittle with age
- **High bond strength** - adheres to a wide range of substrates
- **Extensive track record** - worldwide projects
- **Quality product** - manufactured in the U.K. to industry standards

ROOFTEX is extremely versatile and can be used to waterproof structures such as roofs, balconies, planter boxes, podium decks, wet areas and construction foundation work.

ROOFTEX is supported by a full range of ancillary products including primers, reinforcing scrim and decorative finishes such as coloured slate granules and heat/light reflective silver coating.

ROOFTEX has been tested to both British and American industry standards.

ROOFTEX is available worldwide through a network of Agents/ Distributors and Applicators in over 30 countries.

“The ultimate in high performance liquid waterproofing”

The **ROOFTEX** system has been used on many of the world's most prestigious developments.

Waterproofing protection you can trust.
